

KRÄMER+GREBE is one of the market leaders in precision moulding and tooling development, engineering and manufacturing from prototype to production tooling. The firm specialises in creating casting solutions for complex geometry castings with high-performance requirements and is a recognised partner of the international automobile industry and foundries. For decades innovative solutions have been developed for light metal casting, including in high pressure die-casting, permanent moulds and precision sand casting processes.

We are looking to hire a qualified and committed personality for our Team to start at the earliest possible date as

## **Casting Process Consultant (m/f)**

### **Your role:**

- You will plan and carry out the technical support of casting processes with the customer, especially for new casting part development plants.
- You will undertake process analyses, develop technical concepts, requirement specifications and optimisation proposals with regards to costs, quality, environment as well as concrete tasks to implement customer wishes in the best possible way.
- You will identify creative measures for innovative tool development and optimisation.
- You will support the development team in preparing suitable casting processes for future aluminium casting products.
- You will organise and execute our in-house casting process training for the project and development teams.
- You will provide our sales team with expert input should they have questions and advise them on the casting process.

### **Your profile:**

- A successfully completed university degree in Engineering with a focus on foundry technology or a comparable subject
- Several years' experience in Sales in the foundry industry
- Sound knowledge of casting tools and casting processes
- Knowledge of CAD, simulations and other IT-based calculation and/ or analytical tools
- Professional and personal consulting expertise, as well as enjoyment in working intensively with customers
- Willingness to go on national and international business trips
- Very good knowledge of English
- Personality that shows initiative, analytical capability, solution orientation and assertiveness
- Strong awareness of quality and costs, structured and independent way of working
- Excellent communication skills, commitment and ability to work in a team

### **What we can offer you:**

- a position with responsibility in an innovative and efficient team at one of the market leaders in the industry,
- a demanding and varied role in an international environment with creative freedom and possibilities to develop personally,
- attractive remuneration
- Intensive and structured training and the support from the engineering and sales teams.

Please send your application to our HR-Department.

Mrs. **Myriam Soualmia**, [personal@kraemer-grebe.de](mailto:personal@kraemer-grebe.de), **+496461 800817** will help you in case of questions.
